---

Attend this informative webinar to:

1. Review updated HEDIS measures for medication adherence.
2. Discuss the incidence and economic impact of medication non-adherence and define different types of non-adherence.
3. Describe strategies and interventions for improving medication adherence, especially in patients with dyslipidemia, hypertension and diabetes.
4. Evaluate the use of high-risk medications for elderly patients and benefits of generic dispensing.
5. Recognize the benefits of collaboration with other healthcare professionals to meet measures and improve outcomes.
